

SteriPlan™

Autoclave Service Plan Overview

Stericare's team of highly trained and dedicated service engineers are located at key points throughout the South West of the UK to provide a prompt response and efficient service. We offer a range of service plans (SteriPlans) specifically designed around the needs of the autoclave user, to ensure your equipment is safe and fully reliable, reducing down time and costly unscheduled service visits.

Each SteriPlan consists of a number of planned maintenance visits across the year (every 4 or 6 months) and priority response for any emergency or breakdown calls.

Our SteriPlans also help you meet your statutory compliance requirements. Every SteriPlan account holder receives a logbook to record and store all maintenance and examination records and pressure vessel certification to ensure compliance with the Pressure Systems Safety Regulations of 2000.

SteriPlan Benefits

- **Convenient** — all service visits are arranged at your convenience to ensure no interruptions to your busy practice.
- **Cost Effective** — include the cost of spare parts into your SteriPlan so that you can budget and plan effectively.
- **Peace of Mind** — No restrictions on the number of emergency call-outs.
- **Unlimited Technical Support** — call us at any time should you have questions, concerns or issues with the safety or efficacy of your equipment.
- **Compliance** — each autoclave receives its own maintenance log book and certification of pressure regulations compliance.
- **Free Loan Equipment** — should we not be able to repair the equipment whilst on site.
- **Flexible** — add compliance coverage for your compressor as well. Price reductions for multiple autoclaves at the same location.

Our service engineers carry a comprehensive stock of spare parts within their vehicles ensuring that they can resolve most problems quickly and efficiently.

We also provide our SteriPlan customer's unlimited technical support over the telephone, or by e-mail, to help with any questions or issues they may have concerning the safety or reliability of their equipment.

Call Stericare today on 01749 871 259 to decide which is the right SteriPlan for you.

Decontamination Assurance Since 1987
